**ALL ALLOWED IN ORGANIC FARMING**

**CHARACTERISTICS AND NUTRITINAL TARGETS**

This line of products prevent and cure manganese deficiencies. They increase carbohydrate and dry matter production.

**METHODS OF APPLICATION AND DOSAGES**

**Manganese 122 L.** by foliar application on fruit trees, horticultural and flower crops to prevent and cure manganese deficiencies. As a preventative 2-3 applications with a dosage of 100-150 g/100 litres of water; as a cure at first symptoms of manganese deficiency, applications to be made once a week until symptoms disappear, with a dosage of 150-200 g/100 litres of water.

It is advisable to use 500-1000 lt of water per hectare to optimize product distribution but the product can also be used with higher concentrations.

The product can also be applied by fertigation system with a dosage of 10-15 kg per hectare.

**Manganese Solfato monoidrato 32 % Mn F.U.** by fertigation system, mixed with other nutrients in order to create a balanced solution or on its own for manganese deficiency, with a dosage of 5-6 kg/ha. The product can also be used by foliar application with a dosage of 1,5-2 kg/ha on all crops. It is ideal for soil less crops.

**PACKING:** kg 1 – kg 2,5 – kg 5 – kg 25 (Manganese Sulphate ); kg 1- kg 5 – kg 25 (Manganese 122 L.)
